David A. George

Product Designer + Developer
dav.a.george@gmail.com | (757) 284-6856

I'm a product designer and front-end developer with a particular interest in UX and UI design, engineering, and usability with a profit-driven approach. The projects I've led and worked on range from creative exploration to achieving rigid business goals.

October 2019 –
Product Designer + Developer
CapCenter | Richmond, VA

- Led digital product design for a Fintech company specializing in mortgages and loans
- Led Loan Application redesign, NPS grew 2+ points and loan volume grew 500% to $1.2B
- Continuing to lead ongoing UX & UI design direction for the Loan Application product
- Led design and development on numerous financial tools and educational content
- Actively leading UX & UI design and front-end development (React, Typescript, HTML, SASS) for Home Search product
- Actively leading front-end development for entire website redesign
- Actively contributing UX & UI designs to website redesign project

September 2021 – December 2021
Consultant
NBA Top Shot + Dapper Labs | Richmond, VA (remote)

- Technical marketing consultant on the NBA Top Shot crypto/NFT project for Dapper Labs
- Implemented data normalization for personalizing emails at scale for 2M+ users
- Helped facilitate onboarding through creative campaigns and A/B testing

January 2017 – October 2019
Lead UX Designer + UI Developer
Dito | Richmond, VA (remote)

- Lead product design for a Premier Google Partner
- Designed, built, and deployed custom apps on the Google Cloud stack/ecosystem
- Led design discussion with internal stakeholders and clients
- Led UX discovery and owned UX design process for internal and client projects
- Led UI design and development efforts for internal and client projects
- Sketched, wire-framed, and wrote production-level UI code (React, Angular, HTML, SASS)
- Led testing for uncovering actionable user feedback and missing product requirements

March 2015 – January 2017
Marketing + Google Maps Solutions Developer
Dito | Richmond, VA (remote)

- Lead technical marketing development and management
- Designed and implemented marketing automation systems, improving event management and eliminating need for an entire administrative position
- Gave technical demos and sales presentations at Google offices across the country on G Suite and Maps
- Promoted to Google Maps solutions developer position, consulting on Maps APIs
- Responsible for $1.2M yearly sales quota

December 2013 – May 2014
Senior Client Strategy
Koofers.com (Docsity) | Blacksburg, VA

- Led strategy for biz dev and client retention for the top college study tool in the nation
- Responsible for sales funnel, lead conversion, and developing client marketing strategies
- Developed conversion-optimized UIs and landing pages
- Role continued until acquisition in 2014 (now Docsity).

May 2012 – December 2013
New User Experience Lead
Heyo (prev. Lujure) | Blacksburg, VA

- Drove free trial user volume and oversaw trial-to-purchase conversions
- Designed landing pages and forms and analyzed customer action, purchase motivation, and usage
- Wire-framed and prototyped digital products
- Created on-boarding UX flows and UI screens and ran live user-testing scenarios
